

GRC & Cybersecurity Portfolio

Prepared for: Sasha-Kay Simpson | Apex AI Solutions

Tier 1: Core Compliance & Risk

Project 1: GDPR Compliance Assessment

A comprehensive assessment of "JamaicaTech" against EU GDPR mandates to ensure global data privacy standards.

Requirement	Gap Analysis	Remediation
Art. 30: ROPA	No centralized log of PII.	Develop Data Inventory Map in Firebase.
Art. 32: Security	MFA not enforced for all admins.	Implement mandatory MFA across cloud environments.
Art. 33: Notification	No 72-hour reporting timeline.	Create Incident Response Playbook.

Project 2: SOC 2 Readiness Assessment

Evaluation against the five Trust Service Criteria (Security, Availability, Confidentiality, Processing Integrity, Privacy).

Key Finding: Change Management requires formalization. Peer reviews (Pull Requests) must be enforced to ensure "Processing Integrity."

Project 3: Third-Party / Vendor Risk Assessment

Framework for vetting supply chain risks associated with cloud providers and AI vendors.

- **Critical Vendors:** AWS, Firebase, Stripe (Full SOC 2 review required).
- **Risk Scoring:** Probability x Impact matrix used to approve or reject vendors.

Project 4: Data Flow Maps & Classification

Visual mapping of data ingestion from frontend to database, including classification levels (Public, Internal, Confidential, Restricted).

Project 5: Business Continuity Plan (BCP)

Resilience strategy focusing on RTO (4 hours) and RPO (15 mins) for remote operations.

Project 6: CMMC Level 2 Readiness (NIST 800-171)

Strategic alignment with DoD cybersecurity standards for handling CUI (Controlled Unclassified Information).

Domain	Practice	Evidence Artifact
Access Control	Limit system access.	Provisioning Logs / MFA.
Incident Response	Handling capability.	IR Plan.
Audit	Retain audit logs.	SIEM / Log Retention Policy.

Tier 3: Strategic Leadership

Project 7: Privacy Impact Assessment (PIA) - AI Systems

Assessment of the "AI Dispatch Engine" to mitigate automated decision-making risks and data leakage to LLM providers.

Project 8: Annual GRC Executive Report

High-level dashboard summarizing JamaicaTech's security posture, risk landscape, and future strategic roadmap for C-Suite stakeholders.
